2

# Does your firm have cyber insurance?

2

# Does your firm have cyber insurance?

## Minimum Evidence

Dec of Insurance Policy

3

# If you had a cybersecurity incident or breach, do you know what to do?

3

# If you had a cybersecurity incident or breach, do you know what to do?

## Minimum Evidence

Copy of your Incident Response Plan or the Front Page and the Table of Contents

4

# Do you know who your Security Officer is?

4

# Do you know who your Security Officer is?

## Minimum Evidence

Her or his name and contact information

5

# Does your firm have a list of approved vendors?

5

# Does your firm have a list of approved vendors?

## Minimum Evidence

A document with the approved vendors

6

# If your computer or device gets lost or stolen, can your team remotely lock or wipe it?

6

# If your computer or device gets lost or stolen, can your team remotely lock or wipe it?

## Minimum Evidence

A screenshot showing the feature to lock or wipe

7

# Would your new computer be blocked from accessing your firm systems and data until approved by your Security Officer?

**Unknown Device**

**System of Private Data**

7

# Would your new computer be blocked from accessing your firm systems and data until approved by your Security Officer?

## Minimum Evidence

A screenshot showing a device being blocked

8

# On your new computer, are you blocked from installing applications that are not approved?

8

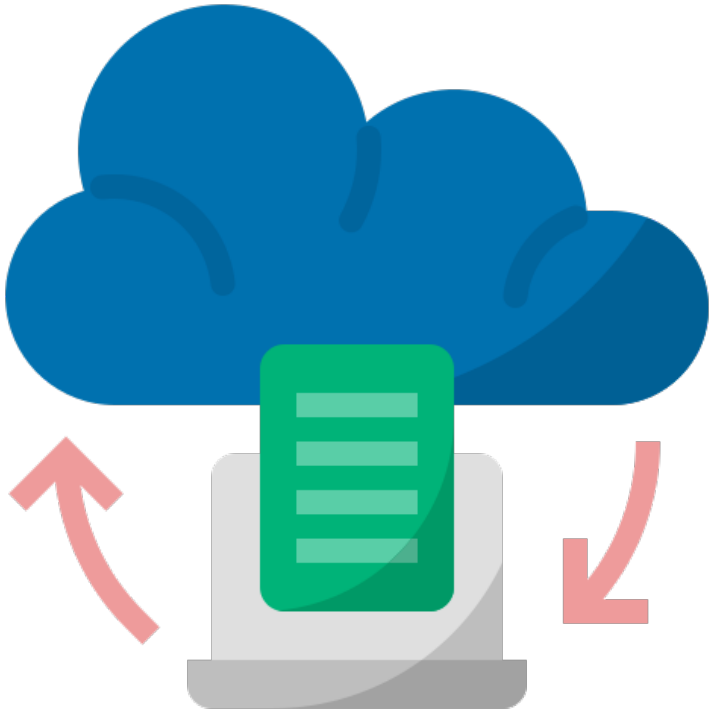
# On your new computer, are you blocked from installing applications that are not approved?

## Minimum Evidence

A screenshot showing the installation being blocked

9

# When you transfer private data are you prompted to allow or block the transfer?



9

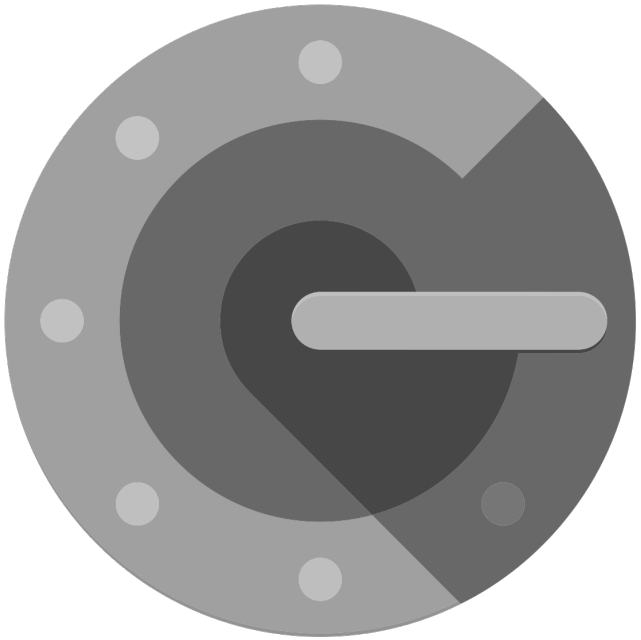
# When you transfer private data are you prompted to allow or block the transfer?

## Minimum Evidence

A screenshot showing the prompt

10

# Does every system you log into require Multi-Factor Authentication (MFA)?



**MFA**

10

# Does every system you log into require Multi-Factor Authentication (MFA)?

## Minimum Evidence

A document with approved vendors should have a column with MFA Enabled

# Does your MFA know who and where you are?

# Does your MFA know who and where you are?

## Minimum Evidence

Ask your Security Officer to provide evidence of your latest login

# Is your IP address always the same no matter where you are?

# What all firms should do to advance cybersecurity

1. Get Leadership Engaged in Cybersecurity
2. Assign someone on the team responsible (SO)
3. Get a evidence-based risk assessment by a firm that understands financial services cyber regulations
4. Implement Safeguards, Harden Systems and Remediate Identified Deficiencies
