1. MANAGED CYBERSECURITY SERVICES STATEMENT OF WORK (SOW)

This Managed Cybersecurity Services Statement of Work (this “SOW,”) dated on (the "SOW EFFECTIVE DATE”) is entered into by and between FCI Cyber Inc. (“FCI”) and (the “CLIENT”). This SOW, if applicable, supersedes any previous Endpoint & User Managed Cybersecurity Services Statement of Work that may have been signed between the PARTIES before this SOW EFFECTIVE DATE. This

SOW is in accordance with the terms and conditions outlined in the most recent version of the MSA, as executed by the PARTIES. The PARTIES hereby mutually consent to the following:

2. SELECTED SERVICES & PRICING

2.1 FIRST INVOICE

The first invoice (i) shall include the Implementation Fees detailed in Section 2.2 and the Monthly Fees detailed in Section 2.3 for the initial month, (ii) is payable upon receipt, and (iii) shall be paid before implementation begins.

One-Time Implementation Fees	$5,353.00
Monthly Recurring Fees For first month, paid upfront	$768.00
Total First Invoice	**$5,644.00**

2.2 ONE-TIME IMPLEMENTATION FEES

Selected SERVICES	SKU	QTY	Price	Volume Discount	Subtotal
One-Time Implementation Fees					
Endpoint & User Security					
Up to 10 Users One-Time Implementation Fee	252050	1	$2,899.00	$0.00	$2,899.00
VPN, One-Time Implementation Fee	252095	1	$1,039.00	$0.00	$1,039.00
Backup of Microsoft 365 Email, Teams, and OneDrive, One-Time Implementation fee	254015	1	$779.00	$0.00	$779.00
Attended Software Configuration Services for Conditional Access, per Software, One-Time Fee (plus Hourly if needed)	256070	1	$636.00	$0.00	$636.00
					$5,353.00

One-Time Implementation Fee Total $5,353.00

2.3 MONTHLY RECURRING FEES

Selected SERVICES	SKU	QTY	Price	Volume Discount	Subtotal
Monthly Recurring Fees					
Firm Security					
CISO Portal & Support, Security Incident Response Team Participation, Operations, per Firm, Monthly Firm Instances & Management in Platform Systems / Monthly Reconciliation to Bill on Actuals from each Platform System / Billing Systems / Ticketing System / Scheduling / CISO Portal / Security Officer Support / Incident Response related to the selected services and Breach Support to Authorities, Regulators, and Cyber Insurers	251001	1	$565.00	$0.00	$565.00
					$565.00
Endpoint Security - All Computers					
Visibility, Cyber Settings & Safeguard Enforcement, Endpoint Protection with EDR & DLP, per Computer, Monthly Actionable Dashboard / Technical & Cyber Posture Asset Inventory Reports / Remote Management and Monitoring (RMM) / Enforcement of Complex Password, Screen Saver, USB Encryption, etc. / Full-Disk Encryption (FDE) and Key Retention / Computer OS MFA (requires FCI User Security Services, no PIN, a Microsoft Local Account, and Username Synchronization with M365) / OS Security Patch Settings & Reboot Enforcement / Antivirus, Anti-Malware, Anti-Ransomware, Behavioral Analysis, and AI / Endpoint Detection and Response (EDR) / Managed Extended Detection & Response (MXDR) / Basic Data Exfiltration Protection & Endpoint DLP (Data Leakage Protection)	252040	1	$52.00	$0.00	$52.00
Basic Third-Party Software Patching & Reboot Enforcement, per Computer, Monthly For Supported 3rd Party Software / Requires Users to be Priviledge User on the Computer	252080	1	$5.00	$0.00	$5.00
IT Support, Remote and Attended, During Business Hours, per Computer, Monthly	252096	1	$85.00	$0.00	$85.00
					$142.00
Endpoint Security - Selected Computers					
VPN, Cloud-Based Firewall, per Computer, Monthly Always-On VPN / 1-Year VPN Logs / Cloud-Based Firewall / Secure Access Service Edge (SASE)	252090	1	$20.00	$0.00	$20.00
					$20.00

Selected SERVICES	SKU	QTY	Price	Volume Discount	Subtotal
Endpoint Security - Smartphones & Tablets					
Visibility, Cyber Settings & OS Enforcement, per S&T, Monthly Technical & Cyber Posture Asset Inventory Reports / User-Remediated Cyber Settings & OS Updates Enforcement at the time of Authentication	253000	1	$7.00	$0.00	$7.00
VPN, Cloud-Based Firewall, per S&T, Monthly Always-On VPN / 1-Year VPN Logs / Cloud-Based Firewall / Secure Access Service Edge (SASE)	253010	1	$13.00	$0.00	$13.00
					$20.00
User Security					
MFA Basic, per User, Monthly Basic Centralized Phishing-Resistant Multi-Factor Authentication / User Lifecycle Management / Onboarding & Offboarding	254000	1	$13.00	$0.00	$13.00
Backup of Microsoft 365 Email, Teams, and OneDrive, per User, Monthly	254010	1	$8.00	$0.00	$8.00
					$21.00

Monthly Recurring Fee Total $768.00

Exhibit A. SELECTED SERVICES DETAILS

Endpoint Security / Computer

Service Name	Description

Visibility, Cyber Settings & Safeguard Enforcement, Endpoint Protection with EDR & DLP **per Computer, Monthly**	• Computer Technical Information & Cyber Posture Inventory Reports and Actionable Dashboard.
	• Correlation between Username, Person, Computer, and Hard Disk.
	• Notification of Appropriate Usage Obligations at Computer Login.
	• Remote Monitoring & Management (RMM) with protection against End-User Disablement or Removal.
	• Enforcement of CLIENT Computers & BYOD without Admin, Physical, and Remote Access to Computers.
	• Cyber Settings Enforcement (Inactivity Timeout, Complex Password, etc.).
	• Full Disk Encryption Enforcement, Off-Site Key Retention, Key Restoration to CISO/Security Officer.
	• OS Security Patch & Reboot Enforcement.
	• Windows OS Reset without losing Data is disabled for End-Users.
	• Deficiency Endpoint Protection with Endpoint Detection & Response (EDR) with Tamper Protection. FCI-Managed Endpoint Protection is automatically installed only if no other Antivirus are already installed on Computers. CLIENT is responsible to uninstall other Antivirus for FCI-Managed Endpoint Protection to be installed. Include Antivirus, Anti-Malware, Anti Ransomware, Behavioral Analysis, and blocking access to Malicious Websites.
	• Windows Basic Data Exfiltration Protection and Data Leakage Protection (DLP)
	  • Only available for Windows Computers with FCI-Managed Endpoint Protection & EDR.
	  • Not available on Apple Computers.
	  • Logging and Notifying Users of Unauthorized Transfer of Files Containing Standard PII.
	  • Logging of Peripheral (USB, removable storage, etc.), Website, and Application Usage.
	  • Compromised Computer Isolation.
	  • Additional Data Exfiltration Protection and DLP configuration for CLIENT-Defined NPI and for Blocking Websites (other than Malicious Websites) and Applications are charged per hour.
	• Basic Conditional Access: Compliance Check at the time of login to block Unknown Computers. Requires Attended Software Configuration Services for Conditional Access. No check for Antivirus and Secure Remote and Local Network Communications.
	• 24x7 Cyber Monitoring.
	• Mass Vulnerability Response, Incident Response Support, and Lost or Stolen Computer Lockdown.
	• Computer Decommissioning Tracking to evidence that media with NPI has been destroyed or erased by CLIENT.

Service Name	Description
Computer Always-On VPN with Cloud-Based Firewall	• Cloud-Based Next Generation Firewall, Secure Web Gateway, Full SSL Inspection, Intrusion Prevention System (IPS), URL and Content Filtering, Always-On VPN and Secure Access Service Edge (SASE) for Secure Remote Network Communications with Conditional Access. Automatically installed on all Computers.

Asset Inventory Report Notes

- FCI shall produce a Technical Asset Inventory Report and a Cyber Posture Asset Inventory Report that shall be sent automatically to CLIENT weekly or monthly, as selected by CLIENT at the time of signature of this SOW. Reports are NIST-Based Single-Line Spreadsheets, Time-Stamped, Sent via email over public networks, and Kept by the PARTIES for future evidence.
- Technical Information Report: Install Date, Hardware, OS, Hard Disk, CPU, RAM, Serial Numbers, Etc.
- Cyber Posture Report: Password Complexity, Password Expiration Date, Password Min Length, Password Max Age, Password History, Active Antivirus Products, Antivirus Definition Status, Antivirus Status Date, USB Encryption, Disk Encryption Product, Disk Encryption Status, Disk Encryption Status Date, TPM Status, Chrome Version, User Admin Status, RDP Access, IT RMM, Machine Status, Group ID, Last Check-in Time, Domain/Workgroup, Contact Name, Last Logged In User, Computer Name, Operating System, OS Version, OS Patch Date, OS MFA, Active Firewall, Firewall Logging, Login Success Log, Login Failure Log, Inactivity Timeout.
- On-demand Asset Inventory Reports can be requested by sending an email to support@fcicyber.com.

Items	Details	Asset Inventory Report Exceptions
Domain-Managed Computers	FCI is unable to enforce password settings on computers that are managed by a Server, Active Directory, Microsoft Accounts, or Entra ID Directory.	• Password field shows DOMAIN MANAGED, MICROSOFT MANAGED or ENTRA ID MANAGED.
Servers	On servers, FCI can only identify Anti-Virus installed and managed by FCI.	• If the Anti-Virus is not installed and managed by FCI, it will show as NOT AVAILABLE.
Unknown Anti-Virus	Most Anti-Virus software are recognized by FCI systems. If not recognized, FCI shall make best effort to configure FCI systems to recognize them.	• If the Anti-Virus is not recognized by FCI systems, it will show as UNKNOWN.
Apple Computers	Depending on computer model and MacOS version.	• Password Expiration field may show NOT APPLICABLE. • Domain/Workgroup field may show a question mark.

Service Name	Description
Basic Supported 3rd Party Software Patching & Reboot Enforcement **per Computer, Monthly**	Features: • Scans & analyzes devices for missing supported 3rd party patches • Dashboard showing count of missing patches • Interaction with End-Users • Show updates, asking to apply or delay the updates • Set patch tolerance • Scheduling • Only deliver to privileged user devices Not included: • No Out-of-Band Patches • No patch to Early Test Group

Service Name	Description
Advanced Supported 3rd Party Software Patching & Reboot Enforcement **per Computer, Monthly**	Implementation fees include up to 30 hours of services over a three-month period. Any additional work requested by the client beyond this period will be billed on an hourly basis at the prevailing rate. Features: • Scans & analyzes devices for missing supported 3rd party patches • Vulnerability prioritization for available patches • Rapid distribution • Scheduling • Creates policy profiles for automation of approval, review, or reject (i.e. test groups) • Ability to override profiles on specific machines • Visibility to issues that take place during patching process • Blackout time frame windows • Detailed history • Ability to deliver on non-privileged user devices • Auto-deployment & auto-update of software 3rd Party Patching Advanced Managed Services: • Manage license features above • Configurations: Installs & auto-updates for select software • Out-of-Band Patches: If there is a vulnerability, we filter on that vulnerability and run commands in order to remediate. • Patch Early Test Group

Data Exfiltration Protection / Data Leakage Protection (DLP)

- Peripherals: Removable Storage, Floppy Drives, Infrared, Modem, Bluetooth, Optical Drive, Secure Removable Storage, Wireless Network Adapter, and MTP/PTP (Media/Photo Transfer Protocol).
- Web Control: Websites visited that fall under supported categories (list available upon request).
- Application Control: Applications running on computers. Over 2600 applications supported (list available upon request).
- Transfers of files matching Rules by supported Apps.
- Apps
    - Email: Lotus Notes, Microsoft HxOutlook, Outlook, Outlook Express, Thunderbird, Windows Mail.
    - Internet Browser: CloudFactory, WorkStream Browser, Firefox, Internet Explorer, MS Edge, Vivaldi.
    - Instant Messaging: MS Lync, MS Office Communicator, MS Teams, Skype for Business, Slack, WebEx Connect.
    - Internet Browser External Processes: Adobe Flash File Uploader, Firefox Plugin Container.
    - VOIP: Skype, WhatsApp.
    - Storage: Floppy Drive, Optical Drive, Removable Storage
- Rules
    - Banking information such as credit card numbers or bank account numbers.
    - American Banking Association routing transit numbers (RTN).
    - CUSIP identifier for North American based equity and fixed income securities.
    - Contact Details - Requires two or more different types of contact details to be present within the same document: Postal address, Telephone number, and/or Email address.
    - Card magnetic track 2 data according to the ISO/IEC 7813 specification.
    - A quantity of EIN in "99-9999999" format within a document that contains either a strong qualifying phrase ("Emp ID Num.") or contains at least one EIN shortly after a qualifying phrase (e.g. "FEIN 999999999"). These 9-digit identification numbers are assigned by the USA Inland Revenue Service to companies: Employer Identification Number (EIN), Federal Employer Identification Number (FEIN), Tax Identification Number (TIN), and Federal Tax Identification Number (FTIN).
    - Numbering systems within this region that can identify individual persons: Social Security numbers, State driving license numbers, and Passport numbers.
    - Contact details near either person identifiers or banking identifiers: Telephone number near bank account number.
    - Especially sensitive personal information such as ethnicity.
    - Contains either phrases indicating confidential information or one of the special "sensitive" document markers i.e. "CTRL:X", "CTRL:XX" or "CTRL:XXX".

Client Responsibilities Related to Computers

Related to	Details	CLIENT Responsibilities
Microsoft Accounts on Windows Computer	By default, Microsoft offers to manage the user accounts Online (Live Account).	• CLIENT must ensure that Microsoft Accounts are Local (not Live).
Domain-Managed Computers	It is not possible for FCI to Enforce Password settings on computers managed by a Server, Active Directory, Microsoft Online Accounts or Entra ID Directory.	• CLIENT must ensure that password settings are enforced by the domain-managed system.
Anti-Virus not managed by FCI	Anti-Virus not provided by FCI must be configured accordingly.	• CLIENT must configure Anti-Virus not-managed by FCI to exclude the c:\protectit folder.
Full-Disk Encryption	FCI cannot enforce Full Disk Encryption on computers without a TPM chip and when a third-party encryption software is enabled.	• CLIENT should uninstall third-party full-disk encryption software in order for Windows BitLocker and MacOS FileVault encryption to be enforced by FCI. • CLIENT shall manually turn on full disk encryption on Computers without TPM chip.
OS Version Upgrade	FCI automatically enforces OS security patches. In the event that FCI is not providing IT support to CLIENT, CLIENT is responsible for other version updates and upgrades.	• CLIENT and FCI latest approved versions of Windows Pro or Mac OS are automatically installed on computers that are configured by FCI to actively receive OS security updates.
Firewall Port 5721	Communication between FCI software agent FCI Data Center is required.	• In the event that CLIENT's firewalls are not managed by FCI, CLIENT shall ensure that to allow communication between computer software agent and FCI Data Center, networks with restricted outbound traffic must have port 5721 opened to protectit.fcasp.com
Asset Inventory Report Review & Computer Decommissioning	CLIENT is responsible to review the Asset Inventory Report monthly, decommission Endpoints, and evidence that media with NPI has been destroyed or erased.	• To initiate the decommissioning process for Computers, the CLIENT CISO, Security Officer, or designated individual is required to submit the list of Computers to support@fcicyber.com along with confirmation that any media containing Non-Public Information (NPI) has been securely destroyed or erased by the CLIENT. • If decommissioning requests are directly received from CLIENTS end-users, CLIENT end-users will be redirected to contact the CLIENT CISO, Security Officer, or the designated mandated individual to request that the individual can then directly submit the decommissioning request to our support team for prompt processing.

Endpoint Security / Smartphone & Tablet (S&T)

Service Name	Description
Visibility, Cyber Settings & OS Enforcement **per S&T** **Monthly**	• Smartphone & Tablet Inventory Report and Actionable Dashboard. • User-Remediated Cyber Settings & OS Updates Enforced at the time of Authentication.. • Compliance Check at the Time of Login to Block Unknown and Unsecured Smartphones & Tablets. Requires Attended Software Configuration Services for Conditional Access. No check for Secure Remote and Local Network Communications. • Incident Response Support.

Service Name	Description
VPN, Cloud-Based Firewall **per S&T** **Monthly**	• Cloud-Based Next Generation Firewall, Secure Web Gateway, Full SSL Inspection, Intrusion Prevention System (IPS), URL and Content Filtering, Always-On VPN and Secure Access Service Edge (SASE) for Secure Remote Network Communications with Conditional Access. • Web & App Communication Controls to block DNS Traffic to CLIENT-Defined Website URLs.

Client Responsibilities Related to Smartphones & Tablets

Related to	Details	CLIENT Responsibilities
Smartphone & Tablet OS Security Patches & Version Upgrade	Multi-Factor Authentication (MFA) shall prompt CLIENT End-Users to complete OS updates before authentication.	• CLIENT end-users are responsible to update their devices Operating System.
Smartphone & Tablet Decommissioning	CLIENT is responsible to decommission Endpoints and evidence media with NPI has been destroyed or erased.	• To initiate the decommissioning process for Smartphones & Tablets, the CLIENT CISO, Security Officer, or designated individual is required to submit the list of Endpoints to • If decommissioning requests are directly received from CLIENTS end-users, CLIENT end-users will be redirected to contact the CLIENT CISO, Security Officer, or the designated mandated individual to request that the individual can then directly submit the decommissioning request to our support team for prompt processing.

User Security

Service Name	Description
MFA Basic **per User, Monthly**	• User & Authentication Device Inventory Reports and Actionable Dashboard. • Basic MFA with Push or 3-Digit Phishing-Resistant (3-Digit Phishing-Resistant MFA requires integration with Universal Prompt-Compatible Software). • User Incident Response Support.

Service Name	Description
Backup of Microsoft 365 **per User, Monthly**	• Daily Encrypted Backup of Microsoft 365 data: Email, SharePoint Online, OneDrive and Microsoft Teams. • FCI Provides Admin Access to CLIENT. • CLIENT Manages Users, Configuration, Encryption Key Management and Recovery, Backup Recovery, and Backup Recovery Tests. • Unlimited Backup Retention.

Endpoint & User Managed Services Implementation

1. Timeframe: After receipt of payment for the first invoice, FCI shall schedule the first implementation call within a maximum of 10 business days. Following the first implementation call, FCI will allocate a minimum of 2 weeks and a maximum of 2 months to successfully finalize the implementation project.

2. Delays: If circumstances beyond FCI's control or CLIENT-induced delays extend the project duration beyond 2 months, the matter will be escalated to the STEERING COMMITTEE for resolution.

3. Project Announcement: For optimal results, CLIENT shall inaugurate the project through a conference call involving all end-users. This proactive approach guarantees that end-users comprehend the project's significance, become acquainted with FCI, grasp the breadth of services procured from FCI, and anticipate receiving the initial email containing the installer link.

To: End-Users

Subject: Installation of New Cybersecurity Software

Dear Team,

Please click on the link below to install the FCI Software Agent on your computer before DATE.
(insert FCI Software Agent installer link here)

With a steadfast commitment to safeguarding both our clients and our organization's integrity, we've partnered with FCI, a leading Managed Cybersecurity Service Provider serving the Financial Industry since 1995. FCI managed cybsercurity services streamlines the process of evaluating your computer's cyber posture, ensuring compliance with applicable cybersecurity regulations.

Installation is automatic and non-disruptive, focusing on technical aspects only, without accessing personal or client data. During the initial implementation phase, no alterations will be made to your computers. Instead, it will meticulously report on encryption settings, antivirus status, firewall configurations, OS updates, and other pertinent information.

For any installation inquiries, contact FCI at support@fcicyber.com or 973-227-8878.

Your collaboration is greatly appreciated. Stay safe!

4. Implementation Phases

The implementation phases are introduced as a template for review and potential adjustments.

Phase	Description
a. Computer Software Agent in Audit Mode	
• FCI and CLIENT review this SOW. • CLIENT is responsible to ensure that all Endpoints have the latest version of their operating system. • FCI shares installation link with CLIENT. • The manual installation of the FCI Software Agent on all CLIENT computers is the responsibility of the CLIENT. • The PARTIES may mutually agree to enforce the automatic installation of the FCI Software Agent. • Software Agent in is Audit Mode (no changes will be made to Computers). • Decision to do a pilot with a few computers or not. • Review of project announcement email template to be sent by CLIENT to CLIENT end-users. • CLIENT shares its Information Security Policy's Cyber Settings Requirements with FCI. • FCI and CLIENT discuss MFA Configuration requirements (Settings and Directory Services). • FCI and CLIENT review Enforcement Check List for future Computer Enforcement. • Plan 2nd call.	
• FCI sends Computer Actionable Dashboard credentials to CLIENT. • Computer Asset Inventory Reports are sent weekly or monthly. • CLIENT organizes a conference call with end-users to announce the project. • CLIENT modifies email template provided above and adds installation link to it. • CLIENT sends email to all CLIENT end-users. • CLIENT receives email notification when end-users install the FCI Software Agent.	
b. Computer Visibility	

• FCI and CLIENT review the Actionable Dashboard and the Asset Inventory Reports.
• FCI and CLIENT review tasks that are CLIENT responsibilities:
  • User normalization (unique and constant usernames).
  • Windows Account that should be changed from Online (Live) to Local.
• FCI and CLIENT plan MFA Implementation.	

4. Implementation Phases (Cont'd)

Phase	Description
c. Multi-Factor Authentication (MFA)	
	• Users download and install MFA Software on their Smartphone. • FCI adds Users and Smartphones to Actionable Dashboard. • User, Smartphone & Tablet Asset Inventory Report is sent weekly or monthly
	• FCI and CLIENT review User & Smartphone Actionable Dashboard and the Asset Inventory Reports. • FCI and CLIENT plan MFA configuration for Known User Validation when login to Computers and/or a compatible Web App.
d. Conditional Access for Known Users	
	• FCI collaborates with CLIENT's Web App administrator in a guided session to configure Conditional Access for Know Users. MFA and the check for Known Users at the time of login. • After this step, Users must use MFA to login to the configured Web App from a Computer, Smartphone or Tablet. • The first time users connect to the configured Web App on a Tablet, they will be required to install software.
e. Computer, Smartphone, and Tablet Enforcement	
	• FCI and CLIENT review tasks that are CLIENT responsibilities: • • User normalization (unique and constant usernames). • Windows Accounts that should be changed from Live to Local. • Existing Antivirus that should be uninstalled for FCI Antivirus to be automatically installed. • Computer without TPM Chip that should be manually encrypted by CLIENT. • FCI and CLIENT discuss CLIENT Information Security Policy's Cyber Settings Requirements. • FCI and CLIENT review Enforcement Check List and plan Computer Enforcement. • FCI Enforces Computer Cyber Settings (Inactivity Timeout, Complex Password, Disk Encryption, etc.) and Tools (Antivirus) with Data Exfiltration Protection/DLP default logging configuration (no customization).
f. Conditional Access for Known Endpoints	
	• FCI and CLIENT review Cyber Posture in the Actionable Dashboards and the Asset Inventory Reports. • FCI and CLIENT plan the Conditional Access for Known Endpoints: At the time of login to the configured Web App, a validation of the endpoint cyber posture is done to only allow access to Secure and Compliant Computers, Smartphones, and Tablets (Cyber settings and tools are enabled and set properly). • Enforced at Conditional Access, Users are required to properly set their Smartphone and Tablet Inactivity Timeout, complex password and/or biometrics, and latest version of operating system.
g. Optional: Custom Data Exfiltration Protection / DLP & Other Cloud Apps Services	
	• FCI and CLIENT agree on next steps for Data Exfiltration Protection / DLP customization and other selected Cloud Apps services.

Remote Attended IT Support Services

Service Name	Description
Remote Attended IT Support Services included during Business Hours	• Provide direct Remote Attended IT support to end-users, ensuring efficient troubleshooting and resolution of technical problems related to computers, smartphones, and tablets used to conduct business and listed in the FCI Asset Inventory Reports supplied to CLIENT. • Support services cover hardware and software troubleshooting, configuration, connectivity issues, printer setup and maintenance, as well as diagnostics and resolution. Additionally, services include managing software upgrades and onboarding new devices.

Service Name	Description
Remote Attended IT Support Services provided outside Business Hours	• Remote Attended IT support services provided outside business hours are limited to resolving technical issues with computers, smartphones, tablets, and printers/scanners that are already onboarded, fully operational, and supported by FCI. FCI does not offer support outside business hours for new device setups, including computers, smartphones, tablets, and printers. • Remote Attended IT support services outside of business hours are reserved strictly for emergencies. FCI requests that CLIENT end-users assess the urgency of their issue and ensure it cannot wait until the next business day before contacting FCI for assistance.

Service Name	Description
IT Support Services not included and charged per item, hardware, hour, or project	• The design, architecture, deployment, installation, setup, expansion, rebuilding, relocating, upgrading of CLIENT network and network equipment. • The setup or support for third-party integrations with CLIENT's systems or software. • Assisting with and providing coordination (technical or otherwise) for the move, relocation, disposal, or destruction of CLIENT's IT assets. • Procuring, providing, or renewing (i) hardware (including loaner or spare devices), (ii) telecommunications, Internet, or domain registrar services, or (iii) third-party licensing, warranties, software, services, or support agreements (FCI shall charge CLIENT for its time but CLIENT is responsible to directly pay vendors for software, licensing, or software renewal or upgrade fees, unless otherwise agreed between the PARTIES). • The migration of email or file systems. • The decommissioning of servers and the off-boarding from VDI (Virtual Desktop Infrastructure) solutions. • Hardware, parts, equipment, and shipping charges.

Service Name	Description
IT Support Services not provided by FCI	• FCI provides support exclusively for Microsoft 365 and supported VOIP software. FCI does not offer support for any other productivity or operational software, nor does it provide assistance to end-users or CLIENT administrators for systems outside of these specified platforms. • FCI does not provided support services for severs and VDI (Virtual Desktop Infrastructure),

Network Security

Service Name	Description

Firewall Implementation Services	• The firewall and VPN Gateway will be configured at FCI office and shipped to CLIENT.
	• Shipping cost is not included and will be invoiced to CLIENT.
	• FCI will remotely support CLIENT's team for installation.
	• Allow 4 weeks for implementation.
	• Hardware shall be paid in advance.
	• Standard configuration includes:
	  • Firewall Patching & Updates.
	  • 24x7 Security, Performance & Availability Monitoring.
	  • Network Content Filtering, Threat Detection, Alerts, Logging & Reporting.
	  • Configuration & Implementation Support of CLIENT Information Security Policy.
	  • Encrypted Offsite Cloud Logs Retention.
	  • Option for SSL VPN Gateway configuration.
	  • Providing CLIENT 1 admin user access to add/remove SSL VPN Gateway users.
	• Optional Network Security services (not included with the SERVICES and billed per hour):
	  • Training to CLIENT 1 admin user to add/remove SSL VPN Gateway Users.
	  • WiFi Configuration, Custom Network Requirements, etc.
	  • Advanced Firewall Configuration.

Firewall Managed Cybersecurity Services	• Managed firewall patching and updates. • 24x7 real-time security event and device health monitoring. • Network content filtering, threat detection, alerts, logging and reporting. • On-Demand Security & Compliance Reporting. • Performance and availability monitoring. • Configuration and implementation support of WISP requirements with templated configuration. • On-demand policy and configuration changes. When-if WISP changes, FCI updates the template and all firewalls are automatically re-configured. • On-demand security and compliance reporting.

Cloud App Security

Service Name	Description
Microsoft 365 Hardening and Management	• Implementing and maintaining robust security and operational practices to protect and optimize CLIENT's Microsoft 365 environment. • Hardening focuses on configuring security settings to reduce vulnerabilities restricting privileged access, applying conditional access policies, and monitoring for unusual activities. • Management encompasses the ongoing tasks required to ensure compliance, reliability, and performance, email and collaboration tools configuration, security updates, and threat monitoring.

Service Name	Description
Security Compliance Check at Login with Cloud Access Security Broker (CASB)	• The management of the integration between Microsoft 365 and the Centralize MFA solution provided by FCI to validate the compliance of an Endpoint when it connects to Microsoft 365. • CASB (Cloud Access Security Broker) is a security solution that acts as an intermediary between users and cloud service providers to enforce an organization's security policies and protect data in cloud environments. CASBs provide visibility, compliance, data security, and threat protection for cloud applications and services.

Service Name	Description
Centralized Configuration Change Logs for Supported Software	• This service continuously monitors and logs Cloud Apps configuration changes to proactively address security risks, ensure compliance, and enhance operational efficiency.

Service Name	Description
Annual Network (WAN) Penetration Testing & Vulnerability Scanning	• 1st scans. • Automated External Vulnerability Scan and Network Penetration Testing. • Unrestricted Web Content. • Local Security Policy Consistency. • Production of a baseline set of advanced cybersecurity reports. • Risk Score and Hardening and remediation recommendations. • 2nd scans. • Scanning report.
Asset Attack Surface & Dark Web Credentials Scanning	• Analysis of Internet-facing domain assets. • Search for breached credentials on the dark web. • Hardening and remediation recommendations. • Scanning report.

Service Name	Description
Domain Dark Web Search & Report	• Charged per Domain. • Search for potentially breached email addresses on the Dark Web. • Provides daily report with potentially breached email addresses. • CLIENT is responsible to contact users to request they change their passwords on the Websites that were potentially breached.

Service Name	Description
Cloud Apps Centralized Logs / Security Information & Event Management (SIEM)	• This service retains logs from supported Cloud Apps in alignment with the SIEM Managed Services specifications outlined in the preceding section.

SIEM Managed Services

Service Name	Description
Security Information & Event Management (SIEM)	• Depending on Selected SERVICES, ingest Software, Endpoint & SASE network data in a few clicks. • Options for 250+ ingestions for endpoint, networking, hardware appliances, cloud services, SaaS applications, and more. • Over 50 pre-built dashboards, including Threat Hunting Dashboard. • Ability to create Custom Detections. • Visual Editor for Custom Reporting & Dashboards. • Detection & Analysis Engine powered by ML & AI. • MITRE ATT&CK® Framework Mapping. • Case Management with Alert Aggregation. • Interactive Data Discovery and Timelines. • SIEM Logs are logs associated with the Selected SERVICES. • Excessive quantities of logs due to unknown sources or sources not related to the selected SERVICES shall be addressed by the PARTIES to avoid logging unnecessary logs and avoid additional disk space that shall be charged by FCI to CLIENT. • If an Always-On Permanent & Persistent Collector Agent is installed on a CLIENT computer, CLIENT acknowledges that if CLIENT computer is down or cannot access the Internet, the logs for this network cannot be processed.

Security Operation Center (SOC) with MXDR Support	• True Extension of CLIENT Team.
	• Complete Visibility and Direct Lines of Communication.
	• Onboarding
	  • Understand CLIENT Environments.
	  • Develop Plan of Action
	• Monthly Touchpoints
	  • Incident and Security Posture Review.
	  • Prevention Control Review & Recommendations.
	  • Visibility, Custom Detections, and Reporting.
	  • Use Case of the Month.
	  • Threat Hunting Recap & Countermeasure Recommendations.
	• 24x7 Threat Detection & Response Support
	  • Triage and Investigate.
	  • Expert Response Support.
	  • Proactive Threat Hunting.
	  • Slack and Microsoft Teams Integration.
	• SIEM Potentially Material Events are events that have been singled out for further consideration, investigation, or action by the CLIENT, specifically to determine if they are material.
